## CONTENTS

Preface
A. Chikan xi

**Inventories in the National Economy**

The volume and structure of inventories
A. Chikán 1
Inventories cycle in an augmented RBC model
F. Collard and J.-F. Jacques 9
Temporal aggregation and estimation of inventory functions
M. Ghali 21
Conditional volatility and the production smoothing hypothesis of inventory investment
I. Ginama 29
Has inventory management in the US become more efficient and flexible? A macroeconomic perspective
A.A. Hirsch 37
Inventory investment in Greek manufacturing industry: Effect from participation in the European market
H. Louri 47
Macroeconomic implications of S,s versus accelerator finished goods inventory strategies
M.C. Lovell 55
Financing constraints and reordering rules
A. Milne 65
Does the time shape of inventory data hold clues on inventory behaviour
P. Reinhardt and D. Beyer 77

**Inventory Management**

Heuristic production triggering mechanisms under discrete unequal inventory withdrawals
A. Banerjee, J. Burton and S. Banerjee 83
Inventory and enterprise integration
M.C. Bonney, M.A. Head, C.C. Tien, N. Huang and R.J. Barson 91
A visually interactive expert system for a distribution center environment
J.G. Carlson and A.C. Yao 101
A conceptual framework for managing congestion in manufacturing
A. Gunasekaran, T. Martikainen, I. Virtanen and P. Yli-Olli 111
Systems design of a two-echelon steel industry supply chain
K. Hafeez, M. Griffiths, J. Griffiths and M.M. Naim 121
A framework for cost-service analysis in differentiation of logistics services
T. Pirttilä and J. Huiskonen 131
A comparison of fixed and adaptive type controls for multi-product processing
P. Kelle and D. Peak 139
Inventories and customer service in Polish manufacturing companies
D. Kisperska-Moron 147
Inventory forecasting with a multiple criteria decision tool
J. Korpela and M. Tuominen 159
A decision aid in warehouse site selection
J. Korpela and M. Tuominen 169

Information systems design requirements for inventory management: A conceptual approach
V. Manthou, P. Notopoulos and M. Vlachopoulou 181
The implementation and use of material requirements planning system in Northern Greece: A case study
V. Manthou, M. Vlachopoulou and P. Theodorou 187
Generic organizational choices for logistics in decentralized organizations: Implications for inventory management
T. Pirttilä and P. Niemi 195
The new management paradigm: An extension through the IFAM perspective
R.T. Nyerges 203
Import related inventory management in Indian economy
K.N. Prasad, (Miss) A.M. Swaminathan and R.G. Parkar 215
A step-wise method for product range management and production control decisions: A case study at a board industry company
T. Pirttilä and R. Sandström 223
Macroeconomic analyses of inventories: learning from practice
L.G. Sprague and J.G. Wacker 231
Reducing inventories in a multi-echelon manufacturing firm: A case study
A.J. Stenger 239
Restructuring the bill of material for productivity: A strategic evaluation of product configuration
P.W. Stonebraker 251
Grain stocking and storing in Benue State: An appraisal of the Federal Government of Nigeria's food grain storage policy
J.C. Umeh, C.C. Agunwamba and O.A.D. Agada 261
Positioning inventory in distribution systems
D.C. Whybark and S. Yang 271

**Mathematical Models of Inventories**
An MCDM framework for dynamic systems
P.J. Agrell and J. Wikner 279
Tracking signals in inventory control systems: A simulation study
P. Alstrøm and P. Madsen 293
Comparison of echelon stock and installation stock policies for two-level inventory systems
S. Axsäter and L. Juntti 303
The undershoot of the reorder point: Tests of an approximation
M.P. Baganha, D.F. Pyke and G. Ferrer 311
Investment policy for multiple product setup reduction under budgetary and capacity constraints
A. Banerjee, V.R. Pyreddy and S.L. Kim 321
Stochastic considerations of Grubbström–Molinder model of MRP, input–output and multi-echelon inventory systems
L. Bogataj and L. Horvat 329
Inventories in spatial models
M. Bogataj 337
Variance laws for inventory management
J.E. Boylan and F.R. Johnston 343
Stability problems in inventory theory
E.V. Bulinskaya 353

Inventory model with two stocks
S. Bylka and J. Komar 361
Controlling a divergent 2-echelon network with transshipments using the consistent appropriate share rationing policy
E.B. Diks and A.G. de Kok 369
Continuous review inventory control when capacity is variable
Y. Wang and Y. Gerchak 381
Some comments on normal approximation for stochastic demand processes
H.-J. Girlich 389
Inventory trigger control policies developed in terms of control theory
R.W. Grubbström and J. Wikner 397
Stochastic properties of a production–inventory process with planned production using transform methodology
R.W. Grubbström 407
Batching policies for a product life cycle
R.M. Hill 421
On queueing models for some multi-location problems
P. Köchel 429
Fuzzy models for the newsboy problem
D. Petrović, R. Petrović and M. Vujošević 435
The extended EOQ repair and waste disposal model
K. Richter 443
A capacity-constrained multi-level inventory and production control problem
A. Segerstedt 449
Some insights regarding selecting sets of scenarios in combinatorial stochastic problems
H. Jönsson and E.A. Silver 463
Optimal solution of a total time distribution problem
C. Tsouros and M. Satratzemi 473
A dynamic game model for distribution problems with non-stochastic uncertainty
F. Blanchini, F. Rinaldi and W. Ukovich 479
Product remanufacturing and disposal: A numerical comparison of alternative control strategies
E. van der Laan, R. Dekker and M. Salomon 489
EOQ formula when inventory cost is fuzzy
M. Vujošević, D. Petrović and R. Petrović 499
Diary of Events 505
Author Index to Volume 45 509
